

ABSTRACT

A collapsible and inflatable fabric-covered toy figure having a fabric casing and a collapsible and inflatable inner tube therewithin. The fabric casing has a bottom opening through which the inner tube can be inserted into the fabric casing. The fabric casing has

5 a head and torso portion while the inner tube has a top portion and a bottom portion conforming to the contours of the head and torso portions of the fabric casing, respectively. An air inlet is placed near the bottom of the inner tube. The inner tube has a flat bottom on which the inner tube or the toy figure can stand up. The head portion of the casing may additional have a pair eyes, nose, beard, and ears. Arm appendages with

10 compressible padding materials are attached on the fabric casing, whereby after manufacturing the inner tube can be deflated and detached from the fabric casing for the ease of packing, storing, and transporting. When use, consumers can inflate the inner tube and put the fabric casing onto the inner tube for entertainment.
